Sandboxed Brave Browser: how it is put together

sketched from the files

Sandboxed Brave Browser: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what Sandboxed Brave Browser is for

WHAT IT IS

A small project in Markdown, Shell. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: README.md, sandbox.sh, LICENSE.

WHAT COMES OUT

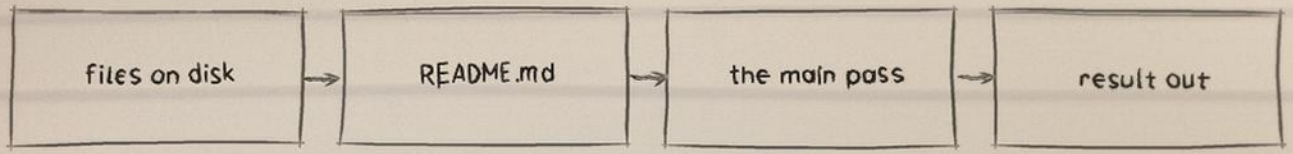

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.
